

Squads to the Rear March

Squads are numbered from right to left when marching for this movement.

The preparatory command of ***First Squad to the Rear*** is begun as the left foot strikes the marching surface allowing the command of execution to be given as the right foot strikes the marching surface. The command should be given in a sing-song pattern at equal counts as to ensure that upon return to original marching direction the squads are still in proper alignment.

The command for this movement would look like this ***First Squad to the Rear, MARCH...Second Squad to the Rear, MARCH...Third Squad to the Rear, March*** and continued on for however many squads you have. To return to the original formation and direction of march the command is ***First Squad to the Rear, MARCH...Second Squad to the Rear, March...Third Squad to the Rear, March***.
